

Short Course Delegate Information – COVID-19

In line with Government guidelines and after assessing the risk for all our courses, we will be re-opening the training centre from 1st June 2020 on a limited basis.

As our priority is the safety of our apprentices, delegates and staff, we have introduced a number of changes and safety measures in the centre. These will be under review daily by Senior Management and any changes implemented immediately.

These new measures consist of the following:

Arrival at Centre

- a queuing system has been implemented at the entrance of the centre with 2 metre distances marked
- one person to be processed at reception at a time
- Sanitiser station on arrival
- Protective screen at reception desk for reducing exposure
- temperature check using thermal imaging to be carried out on arrival. This is no-contact and can be done from 2 meters away
- we have arranged staggered start and finish times for courses to minimise the amount of people arriving and leaving the centre at the same time

Whilst at the Centre

- face masks and other PPE to be worn (where relevant and indicated on individual joining instructions). These will be available if required.
- Reduced class sizes to ensure social distancing can be maintained in both the classroom and workshop areas
- Sanitising stations or handwashing facilities available at each classroom or workshop
- Seating areas have been spaced out to allow for 2 metre distancing
- Where lunch or break is included, individual prepacked lunches will be provided and can be consumed at the classroom desk
- One-way system in place in parts of the centre
- Enhanced cleaning regime has been introduced
- Smoking will no longer be allowed in the allocated smoking area or in the grounds of the centre

Copies of Tullos Training's COVID-19 risk assessments are available from reception if required
